NEW FROM ITT

Bell & Gossett offers an extensive library of 3D Building Information Modeling (BIM) content files in Autodesk® Revit® 2010

Bell & Gossett contracted with CADworks®, one of two certified Autodesk Content Network providers in the world, to transform its HVAC product drawing files into Revit format. Users can select the files directly in Autodesk Revit with a one-time download of the Bell & Gossett Content Module at www.cadworks.net/bellgossett

113 Revit families and 5,252 types now available for Bell & Gossett HVAC product lines

- Pumps: VSX, Series 1510, 1531, 80, 80-SC, 60, and 90
- Pump Accessories: Suction Diffusers and Triple Duty Valves
- Engineered Specialties: Rolairtrols and B&D Expansion Tanks
- U-Tube Heat Exchangers

Advantages of Bell & Gossett Content Module:

- Easy access to integrated content in Autodesk Revit, eliminating the need to search and download files from external websites.
- B&G content is created in Revit 2010 and will be automatically upgraded to future generations. No user patch downloads required.
- Large number of file attributes allow B&G content to work better and smarter within the Revit application.
- Small file sizes for increased productivity.

Benefits of Revit:

- Parametric modeling capability saves time and reduces errors. Allows users to perform space planning and design development with fewer team members.
 - Schedules are linked to geometric model objects and can be used to locate and change object types and properties.
 - Sections and elevations no longer need to be created from scratch.
- Design concepts can be put in 3D quickly for presentation to clients. Leveragable for expanded property management service.
- Models can be shared easily between engineers and architects. Design iterations are handled efficiently.
- Revit is easy to learn and use.
